## EXPERIENCE

### Orange Digital Center (ODC)

*Intern as Software Developer* OCTOBER 2022 - December 2022

An internship program hosted by collaboration of Orange Digital Center and Dot Ethiopia as a software developer. I have experienced modern project management methodologies and tools in this internship program.

### Self-Taught (Learning the Hard Way Experience)

*Since COVID* March 2020 - Present

This is my most valuable experience. I have experimented and learned different programming languages and software development methodologies starting from covid-19 lockdown.

## EDUCATION

### Jimma University, Jimma Ethiopia

*Bachelor's Degree* JUNE 2022

I graduated from the department of Electrical and Computer Engineering (Computer Engineer ) with a GPA of 3.67 in June 2022.

## PROJECTS

### Uber Like Meter Taxi System for Startup called GARI

In this project my role was to develop a mobile application using **Flutter** which is used by the driver and the client. The app contains google maps integration and different routing calculations using google maps API.

### Audience Feedback Collector App for Kana Television

This is a mobile application which contains both client and admin side which helps the user to rate the shows of the programs which are hosted by kana television.

Currently I am working on a project which is fin-tech related and my role in this ongoing project is as a product owner and backend engineer with an agile team containing a team of numbers six.

## SKILLS

### Programming Languages

Advanced Python, Dart, Javascript, Java

### Frameworks

Flutter, Node.js, Nest.js, Django, PyQt5,

### Soft Skills

Project management, leadership
